- Basic experience with FDM technology and slicer software
- Proficient in the Microsoft Office Suite

LANGUAGES

- Italian
- English

PROFESSIONAL PROFILE

My working career began with developing business intelligence systems for corporate managers, where I gained knowledge of corporate management and business intelligence tools. In my second role, I had the opportunity to interact with different companies and their management across all aspects of ESG. During my studies, I was able to explore many production systems and design processes in detail, including developing and building my own projects using metallic materials.

PROFESSIONAL EXPERIENCE

Sustainability manager

Mar. 2024 - Actual

- Sustainability Manager for third-party companies.
- Auditor for customers' ESG KPIs (Environmental, Social, and Governance).
- Development of sustainability reports in compliance with CSRD and CSDDD standards, along with a structured program including long-term sustainability goals.
- Supporting companies in drafting specific sustainability policies and board of directors' meeting minutes.

BI developer

Aug. 2020 - Jan. 2024

- Power BI and Excel implementation for corporate reporting
- Business intelligence architecture Development
- Management of company data structure
- Design and implementation of tailored dashboards

HOBBY AND INTERESTS

My longest-standing hobby is Hi-Fi and audio systems. Over the years, I developed an interest in production systems and CAD due to some personal needs. I am an enthusiast of PC building and customization, and I enjoy keeping up with the latest technologies.
